FOR IMMEDIATE RELEASE

**TECHNOLOGY CENTER DIRECTOR
HONORED BY INTERNATIONAL GROUP**

BOWLING GREEN, O.--Dr. John Sinn, a professor of manufacturing technology and executive director of the Center for Quality Measurement and Automation at Bowling Green State University, has been honored by the International Honorary for Professions in Technology, Epsilon Pi Tau. Sinn received a "Laureate Citation," one of the highest awards presented by the honor society, during a luncheon meeting of the regional chapter of the society. Sinn was cited for his overall efforts in enhancing the programs offered by the college, but especially for his work as director of CQMA, which was established to assist Ohio business and industry in remaining competitive in the world market. Sinn joined the University faculty in 1984 as an associate professor of technology and assistant dean of the then-School of Technology. A year later, he was named associate dean of the newly formed College of Technology. In 1990 he was promoted to full professor and was named executive director of CQMA when it was founded that same year. Sinn earned his bachelor's and master's degrees from Indiana State University and his doctorate from West Virginia University. Before coming to Bowling Green, he taught at West Virginia University and the University of North Dakota. He is a member of the National Association of Industrial Technology, the International Technology Education Association and the American Council on Technology Teacher Education. Sinn is the second faculty member in the last three months to be recognized by Epsilon Pi Tau; in early December, Barry Piersol, assistant to the dean of the College of Technology, was awarded a "Laureate Citation."
